

MODEL MB1 SERIES

- **MATCHING TRANSFORMERS**
- **STANDARD IMPEDANCE-MATCHING**
- **CUSTOM MATCHING**

The MB1 SERIES is a matching transformer unit, used to impedance match our transducers with the output of power amplifiers. MB1 Series units can be purchased alongside our products or as a stand alone item. The transformers are custom wound to the transducer and impedance that you specify. The MB1 comes with SpeakOn connectors as standard, however a BNC connector version is available on request.

MECHANICAL SPECIFICATION

All dimensions in mm

TECHNICAL SPECIFICATION

Standard Impedance-Match	4Ω, 8Ω, 50Ω, 100Ω
Connectors	SpeakOn or optionally BNC
Power handling	Up to absolute maximum of the specified transducer.
